14 LEE CHAVEZ: My name is Lee Chavez and I'm
15 tribal representative for Bishop Paiute Tribal Owens
16 Valley California. First of all, I'm speaking on my
17 behalf that I feel -- well, I think that most people
18 back home feel the way that I do and I agree with
19 everybody's comments that was mentioned here earlier and
20 also a lot of the comments that probably haven't been
21 thought of yet that can be thought of later on which
22 will probably be sent in.

23 And I can't really add on a whole lot to
24 what everybody's already said other than, you know,
25 repeating what's been said. But the NRC has a trust

0022

1 responsibility to all tribal governments, the DOE must
2 meet with each tribal government personally.

3 Second, tribes are not educated on issues
4 concerning the repository and must be educated. And
5 last of all if you recall there were many unanswered
6 questions such as the new and actual fact of terrorism
7 attacks which have not been studied in full and must be
8 studied in its fullness. That's about all I can say
9 other than repeating what other people have said.
